Summary

Software Engineer and Flutter Developer with 2+ years of experience specializing in building scalable, high-performance cross-platform mobile applications. I enjoy transforming ideas into intuitive digital products by combining clean architecture, efficient code, and thoughtfully crafted user interfaces. Leveraging Flutter, Dart, Provider, Riverpod, Cubit, REST APIs, Firebase, and Sqflite, I develop applications that are responsive, reliable, and easy to maintain while prioritizing performance optimization, reduced app size, and smooth user interactions. I believe that great software is defined by attention to detail, so I focus on pixel-perfect UI implementation, comprehensive edge case handling, and production-ready code that remains scalable as products evolve. Passionate about continuous learning and collaborative development, I strive to deliver mobile experiences that are both technically robust and genuinely valuable to users.

Technical Skills

- Programming Languages: Dart, Python, C++
- Mobile Development: Flutter, Cross-Platform Development, Responsive UI, Adaptive Layouts
- State Management: BLoC (Cubit), Provider, Riverpod
- Software Architecture: Clean Architecture, MVVM, SOLID Principles, Clean Code
- Backend & Cloud Services: RESTful APIs, Firebase, Supabase, Cloudinary
- Databases: Cloud Firestore, Sqflite
- AI & Data Science: Python, Machine Learning, Exploratory Data Analysis (EDA), Scikit-learn
- Performance Optimization: App Performance, App Size Optimization, Memory Optimization, Edge Case Handling
- Tools & Collaboration: Git, GitHub, Postman, Android Studio, VS Code

Soft Skills

- Problem Solving, Leadership, Communication, Listening, Team Collaboration, Time Management, Analytical Thinking, and Continuous Learning.

Projects

BrainGuard (Graduation Project) | AI-Powered Stroke Prediction & Remote Patient Monitoring | Flutter, Firebase, Node.js, Hugging Face, Gemini API, Cloudinary | Android

- Developed a cross-platform healthcare application for patients and doctors, featuring secure authentication, real-time communication, medical record management, AI-powered stroke risk assessment, and PPG signal analysis.
- Integrated multiple AI services, including PPG prediction from .mat files, EHR-based stroke risk prediction, an AI medical chatbot powered by Gemini API, and OCR-assisted prescription analysis.
- Built real-time patient-doctor connectivity with chat, QR-based pairing, notifications, appointment scheduling, medication reminders, prediction history, medical history, and cloud file management using Firebase and Cloudinary.
- Designed the application with Clean Architecture, responsive UI, role-based access, performance optimization, reusable components, and comprehensive edge-case handling.

Biscofa | Flutter, Firebase | Google Play | App Store

- A café management system featuring dedicated Customer and Admin applications.
- Developed customer features including product browsing, ordering, order tracking, and a loyalty rewards system.
 - Built admin functionalities for managing products, categories, home content, users, promo codes, rewards, notifications, reports, and orders.
 - Optimized the application for performance, scalability, and a seamless user experience.

Al Hayah Shareholders App | Flutter, Supabase | Google Play | App Store

- A secure mobile application for private hospital shareholders with exclusive access to hospital services and discounts.
- Developed role-based authentication with dedicated Admin and Shareholder experiences.
 - Implemented user management, complaints handling, and secure access to shareholder benefits.
 - Integrated Supabase for authentication and real-time database management.

Event Time Management | Flutter, Restful API | Android

- A mobile application for event registration and attendee management.
- Developed an event registration system connected to Firebase for real-time data synchronization.
 - Built organizer tools to manage registrations and attendee check-in during live events.
 - Designed a responsive and user-friendly experience for both participants and administrators.

Experience

Flutter Mobile Development Trainee | National Telecommunication Institute (NTI), Egypt | Feb 2026 – Apr 2026

- Developed cross-platform mobile applications using Flutter and Dart following modern development practices.
- Built responsive, reusable, and maintainable user interfaces with a strong focus on clean architecture and state management.
- Integrated RESTful APIs, Firebase services, and local storage to create production-ready mobile applications.
- Applied Git/GitHub for version control and collaborative development while following industry-standard workflows.
- Optimized application performance, responsiveness, and code quality through best practices and debugging techniques.

AI Data Science Trainee | Digital Egypt Pioneers Initiative (DEPI) | IBM Program, Egypt | Oct 2024 – May 2025

- Completed an intensive IBM-powered Data Science training program covering Python, Object-Oriented Programming (OOP), databases, APIs, and data processing.
- Performed Exploratory Data Analysis (EDA) and developed machine learning models using algorithms such as K-Nearest Neighbors (KNN) to solve real-world problems.
- Built end-to-end data science projects involving data collection, preprocessing, model training, evaluation, and visualization.
- Worked with structured datasets to extract insights, improve model performance, and support data-driven decision-making.
- Strengthened analytical thinking and problem-solving skills through hands-on AI and machine learning applications.

Leadership & Volunteering

Flutter Head | IEEE Student Branch | Oct 2025 – Present

- Lead the Flutter technical team by mentoring members and organizing hands-on learning sessions.
- Deliver Flutter workshops covering fundamentals, state management, clean architecture, and best development practices.
- Guide participants through real-world projects by providing code reviews, technical support, and practical implementation.

Organizing Committee Member | Codeavour International | 2026

- Assisted in organizing the competition and coordinating participants throughout the event.
- Supported registration, logistics, and event-day operations to ensure smooth execution.

Certificates

- Flutter Mobile Development – NTI | Apr 2026 | [Verify Credential](#)
- IBM-Powered Data Science Program – DEPI | May 2025 | [Verify Credential](#)
- Business English Track – DEPI (OTO Courses) | May 2025 | [Verify Credential](#)

Education

Beni-Suef National University

Bachelor of Computer Science

Oct 2023 – Jul 2026.
